

	Title
13	Radio communication apparatus having speed judging ci
14	Interactive computer system and data analysis method
15	Portable communication terminal apparatus with music
16	Answering system for a communication device
17	Hands-free wireless communication in a vehicle
18	Method and apparatus for organizing and displaying in
19	Programmable cellular telephone and system
20	Display of timer for programming mode of a radio sele
21	Radio selective calling receiver
22	Programmable cellular telephone and system
23	Programmable cellular telephone and system
24	Authentication key entry in cellular radio system
25	Personal communication system having options and noti
26	Radio communication system which displays status of w
27	Personal communication system answerable by proxy
28	Telephone timer apparatus
29	Personal communication system
30	LOTTERY GAME CONTROL PROGRAM, SERVER DELIVERING GAME
31	COMMUNICATION TERMINAL DEVICE, COMMUNICATION SYSTEM.

Brief Summary Text - BSTX (9):

In order to achieve the above object, according to the basic aspect of the present invention, there is provided a radio selective calling receiver including at least a loudspeaker for notifying an incoming call by generating a sound, a function setting switch which is operated by a user to set various functions, a display unit for displaying a message accompanying the incoming call, and set contents of a predetermined function of the various functions, and a timer for counting an elapsed time from the start of an operation of the function setting switch to the end of a time-out time, comprising time-out display control means for causing the display unit to display a counted time, obtained by the timer, until the end of the time-out time.
